Summary

Results-driven Python Django Developer with 2+ years of experience building scalable backend systems, RESTful APIs, and third-party integrations for ERP, LMS, and E-commerce platforms. Strong understanding of MVC architecture and scalable backend design principles. Experienced in secure API development practices including input validation, authentication, and permission-based access control. Skilled in Django, Django REST Framework, PostgreSQL, Redis caching, Linux-based deployments, and performance testing using Apache JMeter.

Technical Skills

Languages: Python, JavaScript (Basics), C, Java
Backend Frameworks: Django, Django REST Framework (DRF)
Databases: PostgreSQL, MySQL, SQLite
Web Technologies: HTML5, CSS3, Bootstrap, AJAX
Deployment & Testing: Linux (Basics), Gunicorn, Nginx, Apache JMeter
Tools: Git, GitHub, Jira

Experience

Python Django Developer — Apr 2024 – Present
Pegasus Consulting — *Bangalore, India*

- Contributed to backend development of TeachEase, designing RESTful APIs following MVC architecture principles and implementing secure authentication, permission-based access control, lesson, assignment, and test management modules. Assisted in production deployment on Linux server using Gunicorn and Nginx.
- Developed core backend modules for a Manufacturing ERP system covering enquiry-to-dispatch workflow, implementing module-level access control, Redis caching, scalable backend design patterns, and third-party integration with SigmaNest. Deployed on Windows Server.
- Independently developed and deployed RESTful backend APIs for GudFudCo (Snacks E-commerce) using Django REST Framework, implementing secure API development practices including input validation, JWT-based authentication, wallet system, coupon management, custom snack builder, order processing, and Razorpay payment integration.
- Integrated MSG91 (SMS/Email), DTDC courier APIs, webhook-based manufacturing app integration, and conducted load testing using Apache JMeter prior to production release to ensure performance and scalability.

Website Developer — Jan 2021 – Aug 2021
Infodawn — *Pathanamthitta, Kerala*

- Mentored students in Django, Python, HTML, and CSS, guiding academic projects with emphasis on clean code practices, MVC architecture understanding, and deployment fundamentals.

Projects

Question Paper Generation System
Developed an automated question paper generation system using Django following MVC architecture principles to dynamically generate structured examination papers with role-based access and input validation.

Link Anomaly Detection in Twitter Streams
Built a system using .NET and SQL to detect and filter spam links from Twitter streams using pattern-based anomaly detection techniques.

Education

Sambhram Academy of Management Studies — Bangalore
Master of Computer Applications (MCA) — *Oct 2021 – Dec 2023*

SAS SNDP Yogam College — Kerala
Bachelor of Computer Applications (BCA) — *Jun 2017 – Sep 2020*

Certifications

- Python Django Certification — Spectrum Softtech Solutions Pvt Ltd
- Python Internship Training — Karunadu Technologies Pvt Ltd
